  Agile, Scrum, Sprint.

PROJECT EXPERIENCE

TechScrum   May 2022 - Aug 2022

Full-stack Developer

Link: https://www.techscrumapp.com/

Description: TechScrum is a project management system that allows users to track the product's developing process. It will provide cost-effective project analysis (in-developing) and data. The primary target users are small-medium businesses.

Key Achievement/Responsibility:

- Applied Agile methodology to work in a team of fourteen members: one product manager, one business analyst, seven developers, and five DevOps.
- Implemented TechScrum with HTML5, CSS3, Sass, Responsive Design, React Icons, Eslint, TypeScript, React, and React Context API.

- Implemented RESTful APIs with Node.js, Express, JWT, Bcrypt, Nodemon, and MongoDB. Implemented front-end and back-end interaction with RESTful APIs.
- Implemented end-to-end test in the front-end by Cypress and integration test in the back-end by Jest.
- Performed HTTP Requests by Axios.
- Took ownership during the application development and reacted promptly to problems. Attended daily standup meetings actively and did self-reflection.
- Implemented pair programming with team members to develop the project more efficiently.

Weather Application   Apr 2022 - May 2022

Front-end React project

Link: https://evan-ldw.github.io/weather-app/

Description: This is a simple Weather application programmed with react hooks and the styled-component library. It mainly displays the weather forecast of four major cities in Australia. Currently, only the front-end design of this app is deployed to the free GitHub Pages.

Key Achievement/Responsibility: Further mastery of ES6, Axios, React Hooks, Styled-components Library and Name Convention. Adhere to readable, maintainable, reusable, and SOLID principles.

My Portfolio Website   Mar 2022 - Apr 2022

Front-end Individual project

Link: https://evan-ldw.github.io/my-portfolio/

Description: This project is a showcase of my personal website, which mainly introduces my experience and professional skills as well as educational background and contact information.

Key Achievement/Responsibility: Implemented this Portfolio Website with HTML5, CSS3, Responsive Design, Font Awesome, and jQuery skills.
